

## KEY INFORMATION DOCUMENT

### Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

## DRAPER ESPRIT VCT PLC

**Product:** Ordinary Shares of 5 pence each nominal value issued by Draper Esprit VCT plc (“Shares”)

**ISIN** GB0002867140

**Names of PRIIP manufacturers:** Draper Esprit VCT PLC (registered number 03424984) (the “Company”) and Elderstreet Investments Limited (registered number 01825358) (“Elderstreet”)

**Website for the PRIIP manufacturer:** [www.elderstreet.com](http://www.elderstreet.com)

**Call this telephone number for more information:** +44(0) 207 831 5088

**Competent Authority of the PRIIP Manufacturer in relation to the KID:** UK Financial Conduct Authority

**Date of production of this Key Information Document:** December 2020

**Comprehension alert:** You are about to purchase a product that is not simple and may be difficult to understand.

### What is this product?

**Type:** Venture Capital Trust

**Objectives:** To provide good long-term tax-free returns to Shareholders through a combination of dividends and capital growth and 30% income tax relief for eligible VCT investors (as long as shares are held for 5 years from the date of allotment and other conditions are met). The Company invests in a diversified portfolio of smaller, unquoted companies with a particular focus on the technology sector.

**Bid-offer spread:** Shares are bought and sold via markets. Typically, at any given time on any given day, the price you pay for a Share will be higher than the price at which you could sell it.

**The recommended holding period** is in the range of five to ten years to allow for underlying investments to mature. The Company is intended to be evergreen and there are no relevant prescribed maturity dates, but it is always open for a majority of shareholders to resolve that the Company should be liquidated. If you subscribe for Shares at issue and hold them for less than five years you will lose any tax reliefs for which you may have been eligible in respect of that subscription.

**Intended retail investor:** a typical investor in the Company will be a UK higher-rate income tax payer, over 18 years of age and with an investment range of between £6,000 and £200,000 who is capable of understanding and is comfortable with the risks of VCT investment.

### Risk Indicator

Lower risk

Higher risk

The summary risk indicator is a guide to the level of risk of this product compared to other products. We have calculated the risk indicator for this product using the prescribed methodology using a weighted historic share price proxy, which has resulted in a classification as 3 out of 7, being a medium-low risk class. This rates the potential losses from future performance at a moderate to low level and poor market conditions are unlikely to impact the amount you could get back. The

risk indicator assumes you keep the shares for ten years. The actual risk can vary significantly if you sell your shares before the recommended holding period and you may get back less. This investment offers no capital guarantee against credit risk. If the underlying companies in which the Company invests do not pay what they owe the Company you could lose part of the capital you invest (but you do not bear the risk of incurring additional financial obligations or commitments). If you sell your shares before the recommended holding period you may not be able to sell your shares easily or you may have to sell at a price that significantly impacts on how much you get back. This liquidity risk is not contractual but is due to there being a limited secondary market for shares in venture capital trusts. This investment offers no capital protection against future market performance so you could lose all or part of your investment if you sell in a poor market.

## Performance Scenarios

The table below shows the money you could realise from selling your shares over the next 10 years under different scenarios, assuming that you invest £10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where the Company is not able to pay you. These shares may not be easy to sell. This means it is difficult to estimate how much you would receive if you sold your shares before the end of the recommended holding period. You will either be unable to sell your shares or you will have to pay high costs or make a large loss if you do.

VCT Income tax relief is available at the rate of 30% to eligible investors that hold their shares for five years (subject to various conditions). No account is taken of this in calculating the scenarios presented below.

Investment Scenarios		1 year	5 years	10 years (recommended holding period)
<b>Stress scenario</b>	<b>What you might get back after costs</b>	£6,613	£7,486	£6,578
	Average return each year	-33.87%	-5.63%	-4.10%
<b>Unfavourable scenario</b>	<b>What you might get back after costs</b>	£9,524	£9,362	£9,553
	Average return each year	-4.76%	-1.31%	-0.46%
<b>Moderate scenario</b>	<b>What you might get back after costs</b>	£10,157	£10,846	£11,774
	Average return each year	1.57%	1.64%	1.65%
<b>Favourable scenario</b>	<b>What you might get back after costs</b>	£10,863	£12,602	£14,553
	Average return each year	8.63%	4.73%	3.82%

### What happens if Draper Esprit VCT plc is unable to pay out?

The value of the Shares and the income derived from them is dependent on the performance of the Company's underlying investments and can fluctuate. Investors could lose all or part of their investment. Your capital is at risk. As a shareholder of the Company you would not be able to make a claim to the Financial Services Compensation Scheme about the Company in the event that the Company is unable to pay out.

### What are the costs?

The Reduction in Yield (RIY) in the table below shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest £10,000. The figures are estimates and may change in the future.

#### Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment Scenarios	If you cash in after 1 year*	If you cash in after 5 years*	If you cash in after 10 years
<b>Total costs</b>	£893	£2,338	£4,666
Impact on return (RIY) per year	8.93%	4.05%	3.45%

\*This product cannot be easily realised. This means it is difficult to estimate how much you would get back if you attempt to realise your investment early. You will either be unable to realise your investment early or you will have to pay high costs or make a large loss if you do so. You will also lose tax reliefs gained on subscription if you sell within five years.

## Composition of costs

The table below shows: the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories.

### This table shows the impact on return per year

<b>One-off costs</b>	<b>Entry costs</b>	0.59%	If shares are acquired under an offer for subscription, Elderstreet Investments Limited will charge a promoter's fee to the Company of either 3.0% or 5.5% of amounts invested depending on the category of investor.  Stamp duty reserve tax of 0.5% is payable if the Shares are purchased on the secondary market.
<b>On-going costs</b>	<b>Portfolio transaction costs</b>	0.00%	The Company's costs of buying and selling underlying investments.
	<b>Other ongoing costs</b>	2.87%	This represents impact of the costs of running the Company each year and includes the fees charged to investee companies by Elderstreet Investments Limited as a result of ongoing monitoring work carried out (where charged, such monitoring fees are ultimately borne by the investee company).  The Company's annual running costs estimated are capped at 3.5% of net assets, which is inclusive of the management fee to Elderstreet Investments Limited of 2.0% and the administration fee to Downing LLP of £65,000.
<b>Incidental costs</b>	<b>Performance fees</b>	0.00%	The potential impact of the Performance Incentive arrangements in place, calculated under the moderate performance scenario.
	<b>Carried interests</b>	0.00%	There are no carried interested associated with this product.

### How long should I hold it and can I take money out early?

The recommended holding period is a minimum of five years because investing in smaller and unquoted companies involves a higher degree of risk and volatility and investments by the Company which prove to be successful may take longer to mature compared to those which prove to be less successful. Investments are likely to be realised by the sale of Shares back to the Company or in the market. The Company has a policy to buy back shares which its shareholders wish to sell, currently at a discount of 5.0% to the most recently announced NAV but its ability to do so may be limited by available cash, the rules of the UKLA, the Companies Act 2006 and the VCT Rules. Accordingly, it is unlikely there will be a liquid market as there is a limited secondary market for shares in VCTs and investors may find it difficult to realise their investments.

### How can I complain?

As a shareholder of Draper Esprit VCT plc you do not have the right to complain to the Financial Ombudsman Service about the management of Draper Esprit VCT plc. Complaints about the Company or the key information document should be sent to the company secretary: Mr. Grant Whitehouse, Downing LLP, St Magnus House, 3 Lower Thames Street, London EC3R 6HD.

### Other relevant information:

**The cost, performance and risk calculations included in this KID follow the methodology prescribed by EU rules. Accordingly, performance scenarios and the risk indicator have been based solely on historic share price total return with dividends reinvested and do not take any direct account of the underlying portfolio of assets held by the Company.**

Depending on how you buy Shares you may incur other costs, including broker commission, platform fees and Stamp Duty. The distributor will provide you with additional documents where necessary. You are recommended to read the Offer document published by the Company before making an investment decision and to confirm with your independent financial adviser that you have the expertise, experience and knowledge to properly understand the risks of investing in the Company. Prospective investors should note that the value of an investment may not get back the amount originally invested. Therefore, you should only make investments in the fund that you can afford to lose without having any significant impact on your overall financial position or commitments. Taxation levels, bases and reliefs may change if the law changes and the tax benefits of products will vary according to your personal circumstances: independent advice should therefore be sought. Please note that it cannot be guaranteed that the companies invested in by the Company will be qualifying companies or that the Company will maintain its qualifying status as a venture capital trust.
